

WORK SCHEDULE

21-Day Cycle | 12 Working Days | 04:00–14:00 Shift

CNHR Framework v4.0 | APP-001 + ARCH-001

Target: £203/day | $\delta = 0.571$ | Pattern: 4-on-3-off

DAILY SCHEDULE (WORKING DAY)

04:00 SHIFT (10h)	15:00 Free (5h)	20:00 SLEEP (8h)
----------------------	--------------------	---------------------

3-WEEK CYCLE (EVERY WEEK IDENTICAL)

	MON	TUE	WED	THU	FRI	SAT	SUN
Week 1	WORK	WORK	WORK	WORK	REST	REST	REST
Week 2	WORK	WORK	WORK	WORK	REST	REST	REST
Week 3	WORK	WORK	WORK	WORK	REST	REST	REST

Working: 12 days (4+4+4) | Rest: 9 days (3+3+3) | Max consecutive: 4 (Mon–Thu) | 40 clock hrs/week | Engaged: 8.66 hrs/shift

KEY METRICS (from cnhr_calculator.py)

FINANCIAL		TIME & FREEDOM	
Daily floor (= target)	£203	Free hrs/day (avg $H(\delta)$)	9.71h
Net contribution/day	£161	Free hrs (work day / rest day)	5h / 16h
Monthly net income	£1,844	τ (free hrs per hr worked)	1.55
CNHR(e)	£12.25/hr	π marginal (decision metric)	£14.64/hr
NLW headroom	+£0.04/hr	π average (descriptive)	£6.24/hr
Fixed cost F (per day)	£31.43	η required (study target)	≥ 0.55
Variable cost v (per day)	£42.00	Weekly hours (clock / engaged)	40 / 34.6

MONITORING PROTOCOL (CONTROL SYSTEM — ARCH-001 §3.4)

After shift	Cumul. target	If below	If above
Day 1 (Mon)	£203	Note only	On track
Day 2 (Tue)	£406	Trend forming	On track
Day 3 (Wed)	£608	FLAG: sacrifice rest day	Rest days protected
Day 4 (Thu)	£811	Record & assess	NLW compliant

Sacrifice rule: If below at Day 3 (Wed), add Friday (demand score 10). Second choice: Saturday (score 8). Sunday never sacrificed. Max 1/week.

Control loop: Target = NLW £12.21 (Property 1) | Sensor = Day 3 at s=30h (Property 2) | Actuator = δ adjustment (Property 3: 14× leverage)

Regime change: Two consecutive sacrifice weeks → revert to d=13 fallback permanently. Reassess ρ .

DECISION RULE

Work if marginal π (£14.64/hr) < value of a free hour. Study hour value $\approx$ £26.70. £26.70 > £14.64 → minimise working days.
NLW sets floor at d=12. Every free hour converted to study earns more than working it.

FALLBACK (d=13, $\rho < \text{£203/day}$):

Wk 1–2: WWWRWWR | Wk 3: WWWRRRR | Max consec: 3 | Floor: £199/day | CNHR(e): £12.39 | $\tau = 1.35$ | Net: £2,021/mo
